SUMMARY

MCA graduate with hands-on experience in Python, backend development, REST APIs, and full-stack web application development through internships and academic projects. Skilled in Python, Flask, JavaScript, React.js, Node.js, SQL, and Git. Experienced in developing REST APIs, integrating databases, building responsive web applications, and integrating machine learning models with backend services. Strong problem-solving skills with an interest in software and backend development.

WORK EXPERIENCE

AI/ML Intern – LPoint

Apr 2026 – Jul 2026

- Worked with Flutter and Supabase for application development and integration.
- Managed application data using PostgreSQL and Supabase.
- Collaborated with the development team using Git and GitHub.

Artificial Intelligence Intern – Infosys Springboard (Virtual)

Dec 2025 – Feb 2026

Remote

- Developed a Skin Disease Detection System using Python, Flask, React.js, and MobileNetV2.
- Implemented image preprocessing and integrated the ML model with Flask REST APIs for prediction.
- Built the React.js interface and integrated it with the Flask backend for image prediction.

EDUCATION

St. Agnes College(Autonomous) – Master of Computer Applications

2024-2026

Affiliated by Mangalore University , Bendoorewell, Mangalore

CGPA : 8.47

PROJECTS

CareConnect – AI-Powered Healthcare Management System

July 2026

- Developed a healthcare management application using Flutter and Supabase with role-based workflows for patients, doctors, and caregivers.
- Implemented authentication, role-based access control, database operations, and REST APIs.
- Built responsive user interfaces and integrated backend services for core healthcare application features.

AI-Powered Real-Time Mock Interview System with Voice Interaction

March 2026

- Developed a full-stack mock interview platform using React.js, Node.js, and Express.js.
- Implemented REST APIs, interview session management, and database integration.
- Integrated voice-based interviews and AI-generated feedback for automated interview evaluation.

Flight Delay Prediction System

March 2024

- Developed a web-based flight delay prediction application using Python, Flask, and Random Forest.
- Built REST APIs and integrated SQLite for storing and managing prediction history.
- Designed a responsive web interface for entering flight details and displaying prediction results.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Backend: Flask, Node.js, Express.js, REST APIs

Frontend: HTML, CSS, React.js

Databases: MySQL, SQLite, PostgreSQL, Supabase

AI/ML: TensorFlow, Keras, Scikit-learn, OpenCV

Mobile: Flutter

Tools: Git, GitHub, VS Code
